Pro Betting Club – Sequence Lays

RULES

1. The selection must be 5.00 or less in the Betfair WIN MARKET.
2. NO BET if the Betfair Starting Price (BSP) of any advised bet is outside the odds range at the off.

STAKING PLAN

1. A betting bank of 100 points is advised for this service. Example: £1000 betting bank = £10 per point
2. Target a given profit. If the horse loses, then add the losses to the target profit for the next bet.
3. Stop at a winner.

NOTES

1. The Sequence Lays system uses Betfair Starting Prices (BSP). BSP odds are only published AFTER the start of the race, so in order to filter on BSP, you need to bet InPlay.
2. All InPlay bets are subject to a Betfair-imposed delay (about 1-2 seconds for normal bets; about 6-8 seconds for bets below the Betfair minimum).
3. If you do not want to bet InPlay then it is possible to use the PROJECTED BSP odds at the time of betting instead of the final published BSP odds. This can be achieved by ensuring that Enable InPlay is UNTICKED on the Criteria tab and changing the Use Odds setting from ABSP to Best on the Bet tab.
4. Last minute changes in odds can mean that bets may go unmatched. If your bet remains unmatched at the off, then the bet should be matched at BSP odds. However, if you want to increase your chances of getting matched as soon as a bet is placed, you can increase the odds at which you place the bet (Betfair will match at those odds or better, if they are available). Please refer to "Maximising your chances of being matched" for more details.

5. By default, all betting tabs are set-up in TEST mode. To place live bets on the Betfair Exchange, please change the Mode to LIVE.

6. If you cannot see the % Recovery staking plan in the dropdown box, please refer to "Why can't I see all the staking plans?" for more details.
